

FEATURES LIST

	Elite	Select	Classic
Operating Environments			
Windows® 95, 98, 98SE, 2000, NT, ME, XP	X	X	X
Operates across any standard PC network	X	X	X
Supports multi-user network installations	X	X	X
Database Compatibility			
Access	X	X	X
Paradox	X	X	X
dBase	X	X	X
FoxPro	X	X	X
Oracle 8.0i	X	X	X
SQL Server	X	X	X
Works with any ODBC compliant database	X	X	X
User-definable alias for database fields	X	X	X
Standard Modules			
Magnetic Encoding	X	X	X
Signature Capture	X		
Double-sided printing	X	X	
Credential Verification	X	X	
Dossier creation	X	X	X
Reporting	X		
Fingerprint Capture	X		
Multiple Image Acquisition Methods	X	X	X
Network Key	X		
Mifare Contactless Smart Card Encoding	X	X	
<i>Upgradeable Modules</i>	X	X	X
Image Capture Support			
Image file (BITMAP)	X	X	X
TWAIN	X	X	X
MCI Video	X	X	X
Video For Windows (VFW)	X	X	X
Image Support			
.jpg, .pcx, .bmp, .png, .dib	X	X	X
Text			
Full True Type Font Support	X	X	X
Supports standard type styles (bold, italic, underscore, etc)	X	X	X
Auto-resizing font capability	X	X	X
Card Encoding			
Supports standard Mifare contactless Smart Card	X	X	X
Supports layout of all three magnetic stripe tracks	X	X	X
Integrate with third-party applications	X	X	X
Design Attributes			
Duplex card designing capabilities with different page orientations	X	X	X
Guidelines to help align objects	X	X	X
Zoom in - Zoom out	X	X	X
Crop images during import	X	X	X
Fill background with solid colors	X	X	X
Transparent BITMAP capability (super-impose images)	X	X	X
User-defined object attributes (text colors, fill colors, etc.)	X	X	X
Color selection from standard and custom palettes	X	X	X
Monochrome images can be printed in colors other than black	X	X	X
All Design objects can print according to user-defined conditions	X	X	X
Data controlled graphics display (conditional graphics)	X	X	X

	Elite	Select	Classic
Database fields			
Supports unlimited number of custom database fields	X	X	X
User can create database field name in display (alias)	X	X	X
Create new fields at any time with maintenance utility	X	X	X
Data Entry			
Database records and images can be batch-deleted	X	X	X
Import information from other ODBC databases (see Database Compatibility)	X	X	X
Import of data in .CSV format	X	X	X
Export of data in .CSV format	X	X	X
Preset field data	X	X	X
"Lockable" field data (data entry only allowed in Supervisory Mode and above)	X	X	X
Bar Codes			
Supports all popular bar code types	X	X	X
Supports Symbol® PDF417	X	X	X
Standard or custom color fills	X	X	X
Multiple directions	X	X	X
Customizable narrow bar-width ratio	X	X	X
Card Code Generation Methods			
Manual card code entry	X	X	X
Auto - combined field & increment	X	X	X
Database Queries			
Automatically pull information via card reader	X	X	X
Full queries with customizable record selection and sort parameters	X	X	X
Save queries for later use	X	X	X
User-defined queries	X	X	X
Find cardholders	X	X	X
"Last Used" query	X	X	X
Security Features			
Multi-user security accounts	X	X	X
Password protected application states	X	X	X
Password controlled Dossier view for sensitive data (BB V4.2+)	X	X	X
Printing Environments			
Supports any Windows® compatible printer	X	X	X
Prints on both sides of the card	X	X	X
Prints multiple cards per sheet	X	X	X
Supports CYMKO process color model	X	X	X
Supports printers that merge CMY and K pages at print time	X	X	X
Industry standard and custom page sizes	X	X	X
Landscape and portrait printing	X	X	X
WYSIWYG (What You See Is What You Get)	X	X	X
Card printing			
Print cards individually	X	X	X
Batch-printing (with user-defined selection and sorting options)	X	X	X
Multiple card formats can be batch-printed at the same time	X	X	X
Help and Documentation			
MS Word recognized support	X	X	X
PDF user manual and Getting Started Guide with Adobe Acrobat	X	X	X
Getting Started Guide	X	X	X
Integrated User and Administration Manual	X	X	X
