Polaroid – The name you can trust and rely on for your Identification Card Imaging Needs!

Polaroid's Identification Systems

and product offerings are perfect solutions that will help protect or identify members in all businesses and industries. If you are a small corporation or business that requires a small volume of cards to be produced, we have the product to best meet your needs. If you need a single sided photo or non-photo Identification or Membership Card, B&W or Color, the versatility of our System 50i can easily accommodate any of your requirements.

Optimum performance and high quality

will be obtained with this carefully matched system. The Polaroid 50i RFID printer is user friendly and reliable and produces clear, sharp, edge to edge color optimized identification cards quickly and easily. Our new and enhanced ribbon formulation is

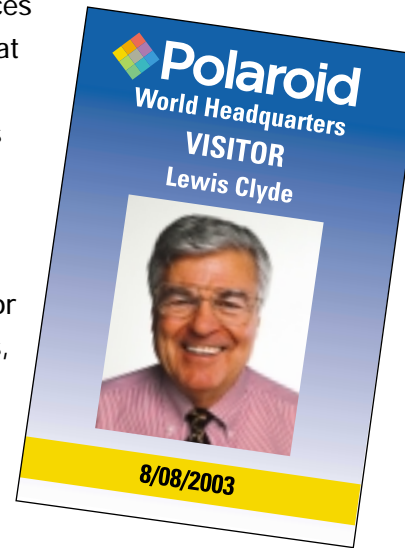

especially designed for our *i*-series printer and will produce superior results each and every time. The Polaroid digital capture camera is small and portable. Also included

is our ID Card Maker I software designed to produce custom ID or membership cards.

Other requirements? Speak with your Polaroid ID representative for additional

products, services and systems that best meet your needs. Systems and services are available to produce and manage small or large databases, batch printing, network installations, and advanced

security features such as fingerprints, smart card encoding, and overlamine stations. Polaroid also offers a complete line of identification card accessories, extended service agreements/warranties and product upgrades to ensure your identification system will always be current.

*For additional information on this or other Identification Card production products or services, please contact Polaroid ID systems at **1-866-IDPHOTO (437-4686)***
